(54) Title: A SEED TAPE INCLUDING SUCCESSIVELY ARRANGED GERMINATING UNITS AS WELL AS A METHOD OF GERMINATING SAID TAPE

(57) **Abstract:** A seed tape including successively arranged germinating units (1a, 1b, 1c) is made of at least one carrier strip (2) as well as at least one layer (3) of biodegradable, gas-permeable material placed on said carrier strip. Each germinating unit (1a, 1b, 1c) includes a mixture of carrier (7), at least one additive (8) and optionally an adjuvant(s) (9) in addition to one or more seeds (10). The layer (3) of biodegradable, gas-permeable material is flexible and non-woven. The additive or additives (8) are water-absorbing. In this manner the seed tape is particularly suited for being subjected to a pregermination procedure because it possesses a very high capacity of retaining water without disintegrating.
